

- 1. Are we required to have a bid bond for the RFP #13-CCLBA-2015 Environmental Abatement Services?**

No, a bid bond is not required for this RFP.

- 2. On the Lead Abatement Pricing are prices to include the cost of materials or labor only? If material pricing is required, what material specifications are to be used?**

For this proposal, we will not be utilizing the Lead Abatement Pricing sheet, since all except one project are demolition. The HOME project will have specific criteria in Contractor and lead work detailed in the specification that will be released through the development of the project. Lead Abatement work for that project will be requested at a later time. An amended RFP will be released on July 10, 2015.
