

The CCLBA is canceling RFP #12-CCLBA-2017 due to the need for additional technical information regarding site restoration after the demolition. At the pre-bid meeting on September 19<sup>th</sup>, several contractors requested a post demolition grading plan. In researching that component, the CCLBA consulted with the City of Marshall and the Calhoun County Procurement Department to determine the best approach. It became clear that a formal RFQ process would be needed to hire a contractor to perform the necessary engineering work to prepare a topographical survey and post-demolition grading plan. As such, the CCLBA will post a formal RFQ for engineering work during the week of September 25, and expects to make a decision about that portion of the project in mid to late October. Once a decision is made, the CCLBA will re-bid the demolition and site restoration work with the new information incorporated into the bid document.
